Indexes to Volume 23 (1991)

The subject index has been organized into seven topics for easy reference. When appropriate, papers have been listed under more than one heading.

Subject index

Nonlinear and quantum optics
Feedback induction – a possible explanation for self-organized growth of $\chi^{(2)}$ grating in silica fibres, 29
Numerical study of femto second travelling-wave amplified spontaneous emission, 45
Rate equation filtering in a semiclassical instability, 53
Sum-frequency generation in the XUV, 91
Subnanosecond response time of a laser beam modulator based on persistent spectral hole burning, 361
Multivalued phase conjugation reflectivity in the reflection type photorefractive four-wave mixing strong coupling regime, 411
Optical chaos in multiple degenerate four-wave mixing, 603
Two-level model of recording and reading of volume phase holograms in photorefractive crystals of BSO-type, 613
Improved coupled-mode analysis of nonlinear distributed feedback structures, 633
Theoretical analysis of pulse shaping of self-phase modulated pulses in a grating pair compressor, 685
Chirping effects accompanying light pulse shortening by nonlinear amplification and saturable absorption, 1161
Raman and photon scanning tunnelling microscopy of optical waveguides, S901
Intermixing of multiple quantum wells for all-optical integrated circuits, S925
High-energy broadband single-pass fibre Raman laser pumped by a cavity-taper output Nd:Yag laser, 1011
Interferometric phase measurements of average field cube $E_{\omega}^2 E_{2\omega}^2$, 1055
Influence of cross-phase modulation and four photon parametric mixing on the relative motion of optical pulses, 1091

Optical waveguides
Surface plasmon polaritons and their uses, 1
Feedback induction – a possible explanation for self-organised growth of $\chi^{(2)}$ grating in silica fibres, 29
Accuracy of approximations for fibre discontinuity analysis, 81
Microlens fabrication on single mode fibres for efficient coupling from laser diodes, 367
A spectacles-shaped optical fibre ring resonator with two couplers, 379
Eigenmodes expansions in lossy open waveguides (fibres), 621
Improved coupled-mode analysis of nonlinear distributed feedback structures, 633
The optical power distribution and scattering losses in symmetric channel waveguide X-junctions, 649
Determination of phase mismatch in a z-propagating $LiNbO_3$ TE-TM convertor, 657
Buried channel waveguides in plasma-enhanced chemical vapour deposited silicon oxynitride layers on silicon substrates, formed by electron beam irradiation, 703
Circularly birefringent optical fibres: new proposal Part II Birefringence and coupling loss, 713
Propagation properties of guided surface polaritons – a new class of electromagnetic waves, 1135
Resultant mode patterns and polarization in LP_{01}, LP_{02} two-mode linearly birefringent optical fibre, 1143
Optimum design of adiabatic weakly guiding nonlinear optical fibre tapers, 1179
Raman and photon scanning tunnelling microscopy of optical waveguides, S901
Applicatons of neutral impurity disordering in fabricating low-loss optical waveguides and integrated waveguide devices, S941
Improved implanted, planar buried heterostructure lasers through enhanced optical confinement, S959
High-energy broadband single-pass fibre Raman laser pumped by a cavity-taper output Nd:Yag laser, 1011
Characteristic analysis of metal clad and absorptive dielectric waveguides by a simple and accurate perturbation method, 1045

Metal vapour lasers
Metal vapour lasers: a review of recent progress, S469

Measurement of spatial coherence of a copper vapour laser beam using a reversal shear interferometer, S477
Stabilization of high-power copper vapour laser, S485
The operating regime of longitudinal discharge copper vapour lasers, S493
High power high repetition rate collisional laser using a He + Eu^+ mixture, S513
Gas laser excitation by an elecron beam formed at open discharge, S523
Investigation of practical high repetition rate copper vapour lasers with external heating, S539
A new circuit for CuBr laser excitation, S549
Stimulated Raman scattering of copper vapour laser radiation in optical fibres, S555
Stimulated Raman scattering of barium laser output in a silica fibre, S563
The transmission properties of optical waveguides in SIMOX structures, 1051

Semiconductor lasers
Spreading thermal resistance of a diode-laser sink, 427
Analytical expressions for the intensity and frequency noise of an individual mode in a multimode semiconductor laser with external optical feedback, 575
Model for noise processes in semiconductor laser amplifiers: Part II The Fabry-Perot semiconductor laser amplifier, 755
Actively mode-locked 1.3 and 1.55 μm InGaAsP diode lasers, 1169
Applications of neutral impurity disordering in fabricating low-loss optical waveguides and integrated waveguide devices, S941
Improved optical confinement, S959
Multiple quantum well mixing and index-guided quantum well heterostructure lasers by MeV ion implantation, S967
Analysis of the relative intensity noise behaviour in tunable two and three section distributed Bragg reflector lasers, 1017
Low linewidth enhancement factor of InGaAsP and InGaAlAs multiple quantum well lasers, 1031
Isolation spectra for InGa/GaAs strained single quantum well laser diode optical switches, 1037
Dynamics of lateral modes in broad aperture injection lasers, 1067
Theoretical analysis of optical pulse position modulation communication systems using semiconductor lasers, 1077

FIR lasers
Hot hole inter-sub-band transition in *p*-Ge FIR laser, S111
Germanium lasers in the range from far-infrared to millimetre waves, S133
Far IR cyclotron resonance and luminescence of hot holes on *p*-GE, S163
Numerical simulation of far infrared emission under population inversion of hole sub-bands, S177
Distribution function, population inversion and FIR gain of hot holes in germanium in crossed electric and magnetic fields, S195
Bragg selecton in hot hole FIR lasers, S205
Spontaneous and stimulated emission of radiation from hot holes from uniaxially stressed germanium, S211
Remarkable effects of uniaxial stress on stimulated far IR emission from hot holes in germanium in crossed electric and magnetic fields, S217
Generation of far-infrared radiation by hot holes in germanium and silicon in E $\perp$ H fields, S221
Saturation spectroscopy of the *p*-Ge far-infrared laser, S231
Hot hole effects in uniaxially stressed *p*-type germanium under $^{\wedge}$E $\parallel$ P $\parallel$ [111], S247
Generation of cyclotron radiation by light holes in germanium, S253
Tunable far-infrared solid-state lasers based on hot holes in germanium S267
Quantum effects in submillimetre hot holes semiconductor lasers, S287
Wide-range tunable sub-millimetre cyclotron resonance laser, S307
Landau quantization and hot hole stimulated FIR emission in crossed electric and magnetic fields, S313
Negative mass cyclotron resonance maser, S323
Numerical simulation of heavy hole cyclotron resonance NEMAG in *p*-Ge, S341

Solid state lasers
A compact subnanosecond high power Nd:YAG laser system, 433
Recent developments in laser resonator design, 1105
High-energy broadband single-pass fibre Raman laser pumped by a cavity-taper output Nd:YAG laser, 1011

Gas lasers
High brightness of a XeCl laser with negative branch unstable resonators, 35
Gain properties of a wide aperture X-ray pre-ionized excimer amplifier, 65
Low gain laser with an unstable cavity, 99
3W average power 4.3 μm CO_2 laser, 405
Recent developments in laser resonator design, 1105

Dye lasers
Saturable absorption dynamics of DODCI, 439
Theoretical analysis of pulse developments in the colliding pulse mode-locked dye laser, 727

Short pulses generation and measurement
Numerical study of femto second travelling-wave amplified spontaneous emission, 45
Interferometric method for the characteristics of the phase and pulse fronts of femtosecond pulses, 73
Subnanosecond response time of a laser beam modulator based on persistent spectral hole burning, 361
Saturable absorption dynamics of DODCI, 439
A three-dimensional model of a low-aspect ratio short pulse dye amplifier, 585
Induced steepening of femtosecond pulses, 639
Theoretical analysis of pulse shaping of self-phase modulated pulses in a grating pair compressor, 685
Theoretical analysis of pulse developments in the colliding pulse mode-locked dye laser, 727
Chirping effects accompanying light pulse shortening by nonlinear amplification and saturable absorption, 1161
Actively mode-locked 1.3 and 1.55 μm InGaAsP diode lasers, 1169

Optoelectronic materials and devices
Wafer and epilayer improvement or integrated optics devices on InP: the ESPRIT project 2518, 391
Spreading thermal resistance of a diode-laser sink, 427
The refractive index of III-V semiconductor strained-layer superlattices, 669
Buried channel waveguides in plasma-enhanced chemical vapour deposited silicon oxynitride layers on silicon substrates, formed by electron beam irradiation, 703
Quantum well shape modification using vacancy generation and rapid thermal annealing, S779
Zinc diffusion in GaAs and zinc-induced disordering of GaAs/AlGaAs mulitple quantum wells: a multitechnique study, S789
Enhanced/suppresses interdiffusion of lattice matched and pseudomorphic III-V heterostructure by controlling Ga vacancies, S805
Sulphur diffusion in GaAs-AlAs superlattices, S813
Aluminium implantation-induced disordering of AlGaAs/GaAs quantum well structures, S823
Cation diffusion in InP/$In_{0.53}Ga_{0.47}As$ superlattices: strain build-up and relaxation, S829
InGaAs(P)/InP MQW mixing by Zn diffusion, Ge and S implantation for optoelectronic applications, S847
Atomistic mechanisms of dopant induced multiple quantum well mixing and related phenoma, S863
Below-bandgap refractive index of AlAs/GaAs multiple quantum wells, S883
Raman and photon scanning tunnelling microscopy of optical waveguides, S901
Ordered-disordered ternary alloys by atomic layer epitaxy S909
Post-growth tailoring of the optical properties of GaAs/AlGaAs quantum well structures, S915
Intermixing of multiple quantum wells for all-optical integrated circuits, S925
Applications of neutral impurity disordering in fabricating low-loss optical waveguides and integrated waveguide devices, S941
Improved implanted, planar buried heterostructure lasers through enhanced optical confinement, S959
Multiple quantum well mixing and index-guided quantum well heterostructure lasers by MeV ion implantation, S967
Thermal interdiffusion in InGaAs/GaAs and GaAsSb/GaAs strained quantum wells as a function of doping density, S975
Partial intermixing of strained InGaAs/GaAs quantum wells, S981
Issues in the realisation of strained layer quantum well optoelectronic devices, S985

Optical communication systems
Optical phase locked loop homodyne receiver using an eight port 90° optical hybrid, 461

Analytical expressions for the intensity and frequency noise of an individual mode in a multimode semiconductor laser with external optical feedback, 575
Model for noise processes in semiconductor laser amplifiers: Part II The Fabry-Perot semiconductor laser amplifier, 755
Theoretical analysis of optical pulse position modulation communication systems using semiconductor lasers, 1077

Classical optics

Surface plasmon polaritons and their uses, 1
Microlens fabrication on single mode fibres for efficient coupling from laser diodes, 367
Digital phase shift holographic interferometry and its application in the experimental flow study, 593
The humming telephone as an acoustic maser, 995
